### [MCD RR5 Ultimate Rolling Chassis](#)

We proudly present our top of the line Racing Spec Buggy the RR5 CF Ultimate. The new RR5 CF Ultimate carries all of the alloy upgrade parts that are developed by the MCD Racing Engineering Department. The parts were used and tested by MCD Racing Team Drivers during many races including

the Euro Championships.

All of the alloy upgrade parts are CNC-machined from 7075 billet Alloy and they are lighter than the composite versions. The alloy parts are hard coated in MCD gun metal color with laser engraved markings.
