

Big Scale Fueltube

03/31/2014 12:39 by Admin (comments: 0) Robitronic

Tygon®-Tube F-4040 A

Item No.: R07130

The aggressive fuel used in the big scale cars (1:4 - 1:6) normally destroys the fueltubes really soon. The tubes get crumbly and break.

Not so with the Tygon®-Tube F-4040 A. The Tube is made special for gasoline used with the big scale cars. The tube keeps flexible for a long time, the transparent material helps you to see the fuel.

Data:

- Inner diameter: 3,2mm
- Outer diameter: 6,4mm
- Wall: 1,6mm
- Length: 11m

Item No.: R07130
