Hobbywing WiFi Express Modul

04/27/2016 17:46 by admin (comments: 0) Hobbywing

The WiFi Module builds wireless connection between ESC and smartphone or computer. Then the user can set the ESC parameters, upgrade the the ESC Firmware, real time monitor the motor RPM and the Battery voltage etc. through the application program in the smartphone or computer.

Features

- Connecting the ESC via WiFi with the smartphone or PC / Laptop
- ESC programming without complicated wiring
- Firmware update
- Motor Data monitoring like RPM in real time
- Battery voltage monitoring in real time

Technical Data

Size (LxWxH): 28,7 x 25,7 x 8,8mm
Input Voltage: 5 - 12.6V
Wireless Protocol: IEEE802.11 b/g/n
Reach: 0-10m (without obstacles)

The WiFi Express Module is suitable for these ESC

- XERUN Series v2.0 and v3.0
- EZRUN Series v2.0
- Platinum Series

Item No.: HW30503000
