

SKYRC Wheel Balancer Set

07/27/2015 15:52 by admin (comments: 0) SKYRC

Available by end of next week!

To get a most possible balanced handling of your RC Car it is very important to have like on a real car tires that are perfectly balanced. Because a tire with an unbalance result quickly in an unstable driving behavior. Based on the vibrations that will arise also some other parts like ball bearings, ball joints and ball cups will wear much faster than with a well balanced tire.

The tire balancer is made out of aluminum an ideal for nearly all available 1:10 Touring car rims & tires on the market. The quick mounting system makes it easy and fast to change or install the tires into the tire balancer from SKYRC
