Incredibly Stable.
Unbelievably Durable.

Easy and fun for ANYONE to fly!

Nano-Micro

Perhaps the World's Most Durable Heli

Our super-durable heli is engineered to be nearly unbreakable in most crashes. However, should you need to replace anything, a full line of replacement parts is available.

▶

Unsurpassed Stability

Chronos CX 75's coaxial, counter-rotating blades offer unsurpassed hands-off stability while cancelling out rotational torque and using differential rotor speed for tail control. The result is an easy to fly heli perfect for all first-time pilots.

The Chronos CX 75 Story

The incredible stability and durability of the Ares Chronos CX 75 makes it easy and fun for anyone to fly an RC helicopter. The co-axial, counter-rotating blade design offers unsurpassed stability that will have any pilot hovering like a pro in no time, while fully proportional controls deliver excellent maneuverability and control.

The Chronos CX 75's nano-micro size and low weight make it possible to fly indoors almost anywhere, and the included 110mAh 1S 3.7V LiPo battery delivers plenty of power and flight times of up to 10+ minutes per charge. In addition, our super-durable heli is nearly unbreakable in most crashes! However, should you need to replace anything, a full line of parts is available.

There is no better way to enjoy piloting an RC helicopter than with the Chronos CX 75. Even if you've never flown before, you'll be flying like a pro in no time.

Ready-to-fly

The Chronos CX 75 is fully-assembled and ready-to-fly right out of the box!

Counter-rotating Blades

Ultra-stable coaxial, counter-rotating blade design makes it possible for anyone to fly.

Flies Nearly Anyplace Indoors

Nano-macro size and weight for smooth and easy flying even in smaller indoor spaces.

2.4GHz Transmitter

3-Channel transmitter with 2.4GHz technology and convenient built-in LiPo battery charger.

Specifications

Length:	7.3in (185mm)
Height:	3.5in (90mm)
Main Rotor Diameter:	6.9in (175mm)
Weight with Battery:	0.7oz (21g)
Main Motor:	Micro Coreless (2 installed)
Battery:	110mAh 1S 3.7V LiPo (installed)
Charger:	1S 3.7V LiPo (in transmitter, included)
Transmitter:	3-Channel 2.4GHz w/LiPo charger (included)
On-Board Electronics:	4-in-1 receiver/2 ESCs/mixer/gyro (installed)

What else

Whats in the BOX

► Chronos CX 75

► 3-Channel 2.4GHz Transmitter with Built-In Lipo Battery Charger

► AA Batteries for the Transmitter

 Introducing Chronos CX75

Reviews

"The small size of the Chronos CX 75 and low weight make it possible to fly indoors just about anywhere you want. This machine is very durable and we put it through its paces. I can only describe it as 'virtually unbreakable.' "

The Ethos QX 75 Story

The Ares Ethos QX 75 may be small in size but it's big on performance and capability for both first-time and experienced quadcopter pilots. The advanced 3-axis gyro control system offers precise control and maximum stability while the nano-micro size allows for easy flying in smaller indoor spaces and fully proportional 4-channel control offers plenty of maneuverability for flying outdoors in light wind conditions too.

The innovative 'Automatic Flip Mode' allows almost anyone to perform 360 degree flips with just the push of a button on the transmitter and the unique body design offers improved visibility to help maintain orientation. An advanced design and composite materials result in low weight and incredible durability plus the airframe is 100% factory-assembled and ready-to-fly right out of the box – no tools or assembly required!

Also in the box is everything needed to fly including AA batteries for the ergonomic 4-channel transmitter equipped with 2.4GHz technology, and LCD screen, dual rates and a built-in USB port, a class-leading 300mAh 1S 3.7V LiPo battery and a dual port DC USB charger for charging from almost any computer or USB power source. That means there's nothing extra to buy and you can be ready to fly within minutes of opening the box.

So whether you're a first-time or experienced pilot, there's no better way to enjoy nano-micro sized quadcopter flying and no better value than the Ethos QX 75!

Unique Body Design

The unique body design offers improved visibility to help maintain orientation and is available in two attractive trim schemes. The included decal sheet also allows you to customize the finish with numbers of our choice when racing with friends.

Ready-to-Fly

The Ethos QX 75 is fully assembled and ready-to-fly right out of the box!

Class Leading LiPo Battery

The class-leading 300mAh LiPo battery provides excellent power and duration while the included dual port DC USB charger allows for convenient charging of spare batteries (AZSH1205) from almost any computer or other USB power source.

Indoors or Out

The advanced 3-axis gyro control system offers precise control and maximum stability while the nano-micro size allows for

easy flying in smaller indoor spaces and fully proportional 4-channel control offers plenty of maneuverability for flying outdoors in light wind conditions too.

Optional

New Optional LED Light Kit (AZSH1214) makes it possible to fly in low-light and even dark conditions indoors and out! (LED kit sold separately)

Specifications

Length:	3.7in (95mm)
Length Including Rotor Blades:	5.5in (140mm)
Height:	1.7in (44mm)
Propeller/Main Rotor Diameter:	2.2in (56mm)

Weight with Battery:	1.3oz (37g)
Main Motor:	Micro coreless (4 installed)
Battery:	300mAh 1S 3.7V LiPo (included)
Charger:	Dual Port 1S 3.7V LiPo DC USB (included)
Transmitter:	4-Channel 2.4GHz (included)
On-Board Electronics:	4-in-1 receiver/4 ESCs/mixer/3-axis gyro (installed)
