

## Supreme performance - the Platinum series by Hobbywing

08/08/2017 15:58 by Admin (comments: 0) New: controllers by Hobbywing

High-quality materials & supreme performance - with the **Platinum series** Hobbywing sets new standards in the field of controller technology. **Excellent control behavior, protection mechanisms and extensive programming and application possibilities** characterize this controller.

### Hobbywing Platinum Pro 40A V4

In spite of the **Power of 40A and operation with 3-4S LiPo**, it has a Startup function for soft start-up and programmable brake functions. High-performance microprocessor with the operating frequency up to 50MHz brings **excellent compatibility and high driving efficiency**.

#### Technical specifications

Solid connection cable: 14AWG

Constant / Peak Current: 40A / 60A

BEC: Switch BEC 5-8V adjustable in 0.1V steps

BEC Voltage Constant / Peak: 7A / 18A

Application: 300 Helicopter, Fixed Wing model and Multicopter

Lipo cells: 3-4S

Protection functions for: voltage cutoff, overload, signal loss, overheat

Measurements: 48x30x15mm

Weight: 47 g.

Programmable with WiFi Express module or LCD programming box
